

Internet Offsite Backup Solution

In the event of disasters like **fire** or **theft**, do you have an **offsite backup** of your **critical data**?

Setup **\$199**
For Only

Data Protection **\$49** Per Month
For as little as

Internet Offsite Backup Solution:

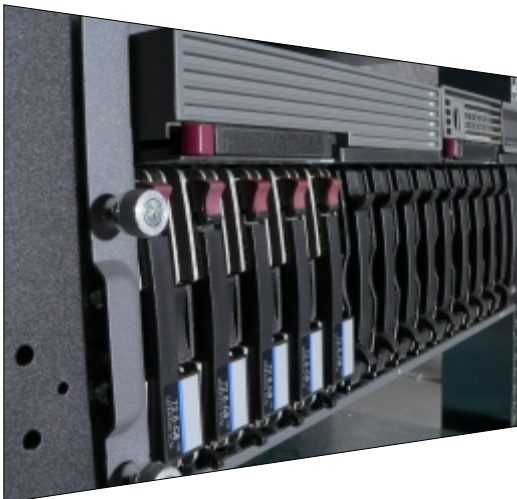

- Fully automated solution that will securely copy data from your server to our remote storage server
- Your data is accessible 24/7 from an easy to use website interface. Your data will be protected by 128bit SSL (secure socket layer) security, the same level of security used by online banking
- There is no storage limit. Your server can upload as much data as possible between the hours of 2am and 6am daily; your storage limit will depend on your internet upload speed

(A typical 3MB Internet connection can upload data at 70KB/s. This means that you will be able to transfer approximately 1.5GB of data between 2am and 6am daily)

Don't trust the security of your data to just anyone, rely on the proven dependability of F1 Tech.

Your **Offsite Backup** can always be checked and accessed 24/7 at backup.f1tech.net
